

“The care of human life, and not its destruction... is the first and only legitimate object of good government.”

Thomas Jefferson

PRO-LIFE NEWS

Vote As If LIFE Depended on It!

Excerpt from Nat'l Right to Life on VOTING

There are many ways to get involved in the fight to help rescue babies from abortion — from volunteering at a life-affirming pregnancy medical clinic, to sidewalk counseling, to financially supporting life-affirming organizations...But one of the easiest and most accessible ways for all pro-life individuals to fight abortion takes place **inside the voting booth**.

We will not all agree on every single issue, yet there are some nonnegotiable issues that we as life-affirming Americans must advance — like the sacredness of human life...The right to life at all stages of development is the defining issue of our day.

We must not become part of the silent majority and allow the pro-abortion movement to continue stripping the most basic rights from our nation's most innocent citizens. Instead, Americans must realize the power that their voices hold to enact social change in our culture.

Become a part of the great movement to end abortion in America in our generation — **get out and vote today**.
